Office Action Summary	Examiner	Art Unit				
	James A. Dudek	2871 .				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Restrictions

All restrictions are hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 48 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 48 is unclear because "said linearly arranged structure" lack the proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 38-39, 41, 45, 47, 49 and 51-53 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4878742 A (742).

Per claims 38, 42 and 52, 742 teaches a substrate for a liquid crystal display apparatus, the substrate having at least one linear slit [the regions between the structures 25], said linear slit having at least on boundary between the ends of the linear slit [the boundary where the narrowing boundaries abruptly becomes wide as defined by the side boundaries of 25].

Regarding claim 42, the first boundary with said linearly arranged slit is inherently less than the slit as the boundary slant towards the center of the slit.

Per claim 39, 742 teaches a narrow portion in said slit, relative to the width of a non-boundary portion of said slit [see narrowing portion of 25].

Per claim 41, see column 1, lines 6-8].

Per claim 53, see electrodes 14, alignment layer 25 along with column 3, fifth paragraph, and negative dielectric LC taught at column 7, paragraph 7.

## Claims 38, 40, 42 48 and 50 are rejected under 35 U.S.C. 102(e) as being anticipated by US US 5905556 A (556).

556 teaches a substrate for a liquid crystal display apparatus, the substrate having at least one linear slit [the regions defined by the pixel and common electrodes as shown in figures 6A-6H], said linear slit having at least on boundary between the ends of the linear slit [the boundary where the narrowing boundaries abruptly becomes wide]. These slits are formed by the absence of the electrodes CE and S.

## Allowable Subject Matter

Claims 43-44 and 46 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Application/Control Number: 09/398,126

Art Unit: 2871

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Page 4

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

Response to Arguments

Applicant's arguments with respect to claims 38-53 have been considered but are moot in

view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The

examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
